RE: CROSS CONNECTION CONTROL
ORDINANCE NO. 587, ARTICLE III,
DIVISION II, SECTIONS 38-3-20, 38-3-21, 38-3-22

Dear Customer;

A cross connection is a physical connection or a potential connection between a safe drinking water supply and water or other substances of unknown or hazardous quality. An unprotected cross connection can, under certain conditions, contaminate the public water supply.

Due to the possibility of contamination, community water supplies are required by the Illinois Environmental Protection Agency to adopt and enforce a cross connection control ordinance. This ordinance will require that all cross connections be eliminated, either by removal, or by the installation of proper cross connection control devices.

The first step in this process is for the Village of New Baden Water Department to survey all the water users in the village. This survey will compile the necessary information to implement the program.

Please take the time to complete the enclosed survey and return it to the Village Clerk's Office by June 15, 2009. Your prompt assistance with this matter would be greatly appreciated. Night deposit box is available 24 hours a day, located on the west side of City Hall. **Failure to return the enclosed survey can result in your water being disconnected according to Sections 38-3-20 and 38-3-21.**

Should you have any questions regarding this matter, please feel free to contact the Village Clerk at 588-3813.

Sincerely,

Village of New Baden
Water Department
